Z-BAR / X-TRA / TELE

COMPACT DESIGN,
BIG IN PERFORMANCE!

With the introduction of the G5000 TOBROCO-GIANT will be active in the 5.0 tonnes class for the first time. The compact and manoeuvrable G5000 machines will become the standard for productivity, comfort and reliability. Whether it concerns work for agricultural purposes, construction & demolition, infrastructure or other areas of application. The G5000 is ready for every job because of the different configurations.

Like all GIANT machines, the G5000 models will distinguish themselves by a high tipping load compared to their own weight. Combined with a powerful, 75 hp, diesel engine, hydrostatic 4-wheel drive with automotive control and 100% switchable lock on both axes, the machines will always have enough grip, a lot of pulling force and smooth movement.

The G5000 models are a solid investment because of their reliability and high productivity. Only the best components have been chosen and tested extensively before they were applied to the G5000 series. TOBROCO-GIANT works closely with quality suppliers like Bosch Rexroth, Comer, Kubota and Hydac during the development of new machines.

TYPES	G5000 Z-BAR	G5000 X-TRA	G5000 TELE
Service weight ¹	5.200 kg	5.100 kg	5.200 kg
Lifting capacity	2.800 kg	3.100 kg	Siehe Grafik
Tipping load	3.510 kg	4.695 kg	Siehe Grafik
Lifting height	3.500 mm	2.850 mm	4.350 mm
Length without bucket	4.165 mm	4.162 mm	4.454 mm
Width	1.460 mm	1.460 mm	1.460 mm
Machine height	2.523 mm	2.523 mm	2.523 mm

¹ Measured with cabin, driver, full fuel tank and earthbucket

STRONG PROPERTIES

- 1. WORKING COMFORTABLY** - A comfortable working environment has been created in the cabin so long working days are no problem. The steering column is fully adjustable and all necessary information can easily be read from a central display.
- 2. WORK SAFELY** - The cabine and safetyroof are internationally ROPS/FOPS certified. The use of narrow styles and skylight gives the operator all-round visibility and an excellent view on his work to allow safe and precise operation.
- 3. SERVICE** - Daily checks and maintenance can be carried out quickly and in a safe manner because service points are easily accessible.
- 4. POWERFUL PERFORMANCE** - The machines are driven by a powerful, 75 hp, Kubota engine that is equipped with a catalytic converter (DOC) and soot filter (DPF) and meet the latest, EU Stage V, clean engine standards.
- 5. COMPACT DESIGN** - The compact dimensions ensure that the machines can operate in small spaces.
- 6. MANOEUVRABILITY AND STABILITY** - The articulated pendulum joint provides manoeuvrability and stability. Unevenness's are absorbed without any compromise to the performance. Optional it is possible to equip the machine with the patented Stabilo system for extra productivity.

- 7. PRODUCTIVITY** - The hydrostatic 4-wheel drive with automotive control (Rexroth) and 100% switchable lock on both, 16-tons, axles always provides enough grip, a lot of pulling force a smooth movement.
- 8. VERSATILITY** - Simply change the attachment and adjust the machine to your working conditions.
- 9. HYDRAULIC POSSIBILITIES** - The hydraulics can be extended to a servo-controlled version. A high flow version is also available, which can deliver 122 l/min to the chosen attachment.
- 10. SPEED** - Optionally, the driving speed can be increased to 35 km/h. Extra pulling force through two-speed gearbox.
- 11. CHOOSE THE MACHINE FOR YOUR WORK** - The G5000 can be configured completely according to your wishes. Depending on your work you choose a Z-bar, X-TRA or TELE version with correct options.
- 12. SOLID INVESTMENT** - The G5000 a solid investment because of its reliability and high productivity. Only the best components have been chosen and tested extensively before they were applied. TOBROCO-GIANT works closely with quality suppliers like Bosch Rexroth, Comer, Kubota and Hydac.

TOP PERFORMANCE

HIGH TRACTIVE FORCE AND SPEED

Whether transporting large quantities of loads or rough-working activities, the hydrostatic 4-wheel drive with automotive control (Bosch Rexroth) and 100% switchable lock on both, 16-tons, axles always provides enough grip, a lot of pulling force a smooth movement.

Optionally, the driving speed can be increased to 35 km/h, which improves productivity even more.

POWERFUL ENGINE

The machines are driven by a powerful and reliable 55 kW / 75 hp diesel engine from Kubota. The engine is equipped with a catalytic converter (DOC) and soot filter (DPF) and meet the latest, EU Stage V clean engine standards.

STRONG WORKING HYDRAULICS

The hydraulic system of the G5000 models is directly controlled via the joystick and is more than sufficient to drive a large number of attachments. If the working conditions demand more, then the working hydraulics can be extended to a servo-controlled version. A high flow version is also available, which can deliver 122 l/min to the attachment. It is possible to have a maximum of 5 double-acting hydraulic functions at the front and one at the back.

ONLY THE BEST COMPONENTS

GIANT machines are a solid investment because of their reliability and high productivity. Only the best components have been chosen and tested extensively before they were applied to the G5000 series. TOBROCO-GIANT works closely with quality suppliers like Bosch Rexroth, Comer, Kubota and Hydac.

COMPACT DESIGN

COMPACT DESIGN
BIG IN PERFORMANCE

G5000 TELE

The G5000 models are designed to operate in small spaces and in rough terrain. Not only the low weight and the compact dimensions ensure this, but the articulated pendulum joint gives the machines a small turning circle and makes them extremely manoeuvrable. This ensures that work can be done very accurate.

Depending on the choice of tires, the machines have a width between 146 and 195 centimetres. The height varies between 2.5 and 2.6 meters, depending on the choice for a safety roof or cabin. Narrow and low passages are therefore no problem and the machines be used inside as well.

CHOOSE THE RIGHT MACHINE FOR YOUR WORK

The G5000 is available in three version, where the robust front frames differ from each other. A version with Z-kinematics is available for activities such as loading and unloading. This Z-BAR ensures a high breakout force and excellent loading heights. A version with telescopic arm is available for work at height. The G5000 TELE has a maximum lifting height of 4.35 meters for fast and efficient loading and lifting. The X-TRA model is equipped with a lower front frame and specifically developed for extremely heavy work and work within the construction and earthmoving.

STABILITY AND MANOEUVRABILITY

The articulated pendulum joint provides the G5000 a lot of stability and manoeuvrability. The system ensures that all four wheels remain on the ground, even when working on uneven terrain. This allows you not only to work safely but there is always sufficient traction.

STABILO-SYSTEM

For extra productivity it is possible to equip the machines with the patented Stabilo System or boom suspension. Both options provide extra safety and comfort because unevenness's are absorbed without any compromise to the performance.

G5000 X-TRA

G5000 Z-BAR

SAFETY AND COMFORT

WORK COMFORTABLE

A comfortable working environment has been created in the cabin so long working days are no problem. The steering column is fully adjustable and all necessary information can easily be read from a central display. While using the joystick, the operator can rest his arm on ergonomically shaped armrest. All key functions are close to the joystick so that they can be easily operated.

WORK SAFELY

The machines are standard equipped with a safety roof and this can optionally be extended to a full-option cabin. The cabins of the G5000 machines have been extensively tested on safety by an independent authority and are internationally ROPS/FOPS certified. All-round visibility gives the operator an excellent view on his work and allows safe and precise operation.

SERVICE

Performing maintenance to the G5000 is easy because the service points are easy to reach. Filters, hydraulic system and engine can be freely accessed via the easy-to-open bonnet, tilting cab or other service panels. This ensures that daily checks and maintenance can be carried out quickly and in a safe manner.

ELECTRONICALLY CONTROLLED

Information about oil temperature, regeneration, etc., can be read from the dashboard so that you can always see these important data during work.

TOBROCO-GIANT WORLDWIDE

DEALER NETWORK

With a large network of dedicated dealers we like to be close to our customers to provide the machines, service and parts that you demand. All dealers are supported by a team of experts from the head office of TOBROCO-GIANT in Oisterwijk, The Netherlands.

TRAINING

At TOBROCO-GIANT we know all the details about our machines. That is why we offer an extensive training program to our dealers. Not only on the newest features or attachments, but also on how to service a machine to the highest standards.

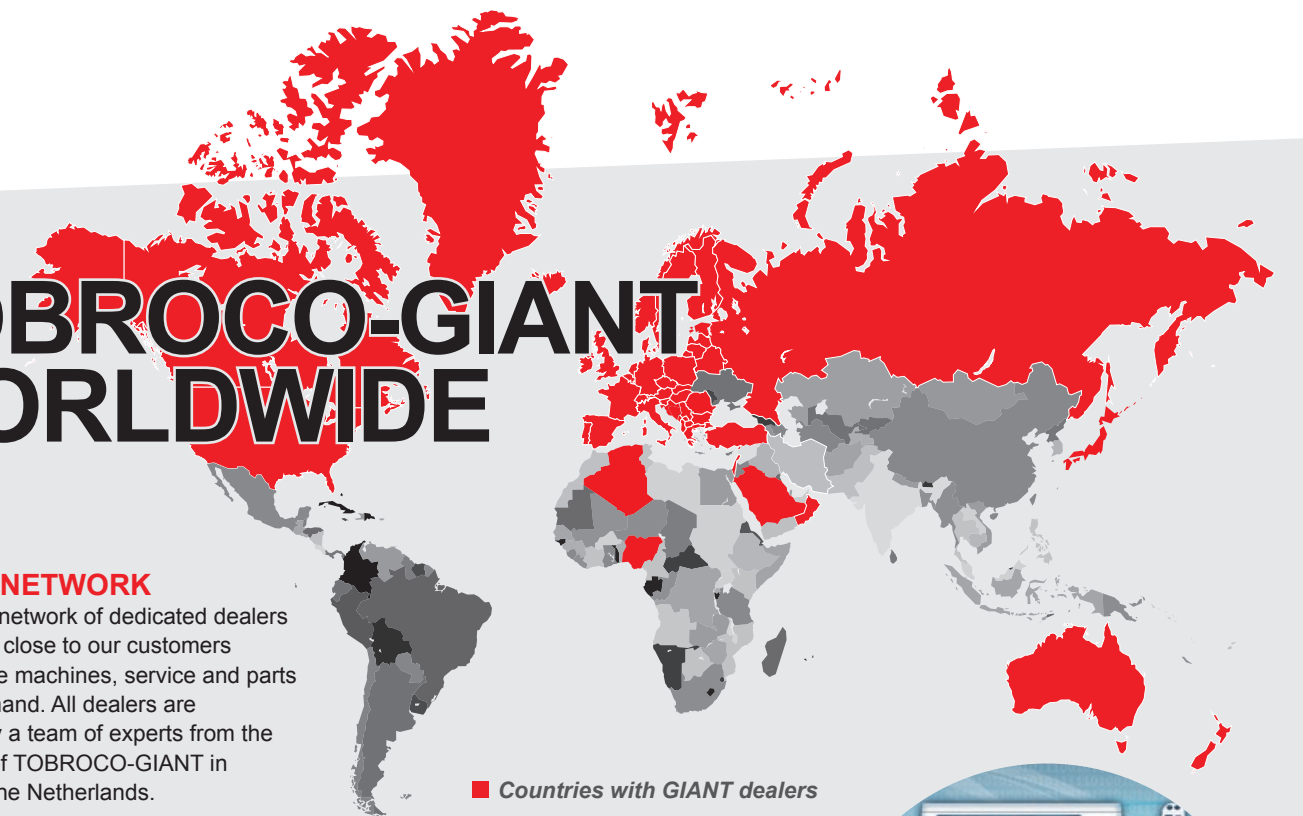

SERVICE & SUPPORT

At TOBROCO-GIANT we offer support, service and high quality parts to protect the investment that you have made in GIANT Machinery. Together with our dealers we are available to make sure that your machine performs in the best possible way. This increases your productivity and will result in an even better return on your investment.

GENUINE GIANT PARTS

The usage of genuine GIANT parts ensure reliable, efficient and safe operation of your machine. We only use the best quality components and test them severely before we introduce a new model. All these parts are vital for the best possible performance and minimising downtime. Keeping your GIANT 100% original saves you money in the end because of reduced running costs and a higher resale value.

■ Countries with GIANT dealers

■ ATTACHMENTS

TOBROCO-GIANT offers more than 100 different attachments so your machine can be used all year long. By choosing the right attachment it is possible to adjust your GIANT to working conditions for agricultural purposes, construction, material handling, private use and many other areas of application. Clear every job with one machine!

HYDRAULIC QUICK COUPLER

The G5000 models are equipped with a hydraulic quick coupler as standard. This makes it possible to change attachments safely and within seconds.

MOUNTING SYSTEMS

TOBROCO-GIANT offers a wide range of mounting systems, enabling you to use the attachments that you have already have.

THE
COMPANY

PROVIDING SOLUTIONS

“We build what you want” is our motto and that is exactly what we stand for. Creativity up, operation costs down – solutions tailored to your needs. The extensive product range of loaders and attachments is designed for your specific needs and can be further customised through various options. TOBROCO-GIANT is more than just a premier supplier of high performance loaders and attachments. We realise that your equipment investment is critical to your business. To assure maximum return on investment, TOBROCO-GIANT provides you with service support and quality parts you can expect from one of the world’s leading compact loader manufacturers.

ABOUT TOBROCO-GIANT

We offer one of the broadest product portfolios in the business with a total of 36 different models in 50 countries, designed and built by a team of 260 enthusiastic employees in our modern factory in Oisterwijk, the Netherlands and 100 employees in Hungary.

TOBROCO-GIANT supplies machines from 750 kg until 6000 kg with engines from 20 hp till 76 hp for the worldwide machine market. Which machine will you choose?

TOBROCO-GIANT SINCE 1996

- 1996

• TOBROCO Machines is founded by the current owner / director Toine Brock.
- 2001

• Development of the first GIANT wheel loader.
- 2003

• Moved to new production facility in Oisterwijk, Netherlands.
- 2003

• Development of the first GIANT Telescopic wheel loader.
- 2010

• Opening of a new production facility in Oisterwijk.
- 2011

• Development of the first GIANT Telehandler.
- 2013

• Opening of new production facility in Eger, Hungary.
- 2014

• Production of the 10.000th GIANT and 25.000th attachment.
• Development of the first GIANT skid steer lader.
- 2015

• Introduction of the patented Stabilo system, an innovative stabilization system that contributes to safety and driving comfort during work.
- 2016

• Opening of TOBROCO-GIANT USA in Des Moines, Iowa.
• Winner of King Willem I Award for best SME in the Netherlands.
• Opening of new R&D Centre for the development of new machines and attachments.
- 2017

• Introduction of the first machines that are compliant with Stage V regulations.
- 2019

• Introduction of the first electric GIANT wheel loader.
- 2020

• Expansion of production facility in Oisterwijk.
